

FAMILY MEDICINE

PHYSICIAN SCIENTIST PATHWAY

I want to both be part of caring for my patients and developing solutions for the future, so the field of primary care can continue to expand.

Rebecca Currier Curran, MD, PhD
University of Utah
FM-PSP Participant

Intersection of Research and Patient Care

The new Family Medicine Physician Scientist Pathway integrates clinical and research training in one residency program, to prepare family physicians for successful careers as independent investigators and academic leaders.

Pilot Sites

Case Western Reserve University

University of California, Davis

University of Florida

University of Kansas

University of Pennsylvania

University of Utah

Virginia Commonwealth University

Skills Development

Grow your abilities in quantitative/qualitative research methods and grant writing; design, lead, analyze, and publish your research; develop academic, scientific, and policy leadership.

Career Benefits

Start toward your career of independently-funded research straight out of medical school without the need to apply to a separate program or to put a pause on research training during residency.
